Amendments to the Claims:

4. The claims have been amended as follows:

Replace claim 13 with the following:

Claim 13 (Currently Amended): A computer system including;

a processor;

a memory, comprising:

a computer-readable information content database, in which parameters descriptive of the content of information services are arranged to be stored;

a computer-readable user profile database, in which parameters descriptive of the users of information services are arranged to be stored;

a computer-readable rulebase, in which the reaction impulses of a test user group to information stimuli presented are arranged to be stored;

a computer-readable database descriptive of an information content space and a user profile space and including theoretical alternatives for the parameters descriptive of the content of the information services;

a computer readable database descriptive of a reaction space and including theoretical alternative for parameters descriptive of the reactions of the users of the information services, the database being created as an interaction of the database descriptive of the information content space and the database descriptive of the user profile space, the interaction being specified based on the reaction impulses defined in the rulebase;

in which computer system metadata files are arranged to be created for at least one user of the information service and for at least one content of the information service by comparing the actual parameters descriptive of said user and said content of the information service with the theoretical parameters based on said reaction impulses specified in the rulebase;

any possible reactions created as a result of the interaction of said user and said content of the information service are arranged to be specified based on said metadata files and the reaction impulses specified in the rulebase;

the desired reaction is arranged to be selected among said possible reactions; and in response to the user starting to browse said information service, the content of said information service is arranged to be modified for presentation to the user to provide an optimal probability of the creation of the desired reaction in the user;

data are arranged to be collected during the use on the reactions of the users of the information services to the information objects presented;

a file descriptive of the user's reactions is arranged to be created based on said data; the achievement of the desired reaction in the user is arranged to be monitored by comparing said file with the database descriptive of the reaction space, based on the reaction impulses included in the rulebase; and

the probability of the achievement of the desired reaction is arranged to be determined based on said comparison.

Allowance

5. Claims 1-7, 9-19 and 21-24 are allowed over the prior art made of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
